Jasmine and elderflower on cooling. Almond brittle.

History

This WILD journey started more than 160 years ago with a pair of Frenchmen – a priest, and an explorer – who dreamed that the goodness of coffee should overflow into Vietnam. Little did they know that 135 years later their dream would capture the heart of one wild Australian explorer who invested in the people, terrain/terra and the culture of Vietnam. He desired to present to the world, the best coffee that Vietnam had to offer. He planted many potential seeds over the mountains while watching, cultivating, preparing and waiting for the perfect time. Divinely, he met an untamed pirate from The Bahamas and together, with WILD hearts they started to refine and hone in on an unrestrained taste profile – a development of rare forgotten coffees in Vietnam.
